

ClearWaters Dechlorinator

ClearWaters Dechlorinator instantly makes tap water safe from added chlorine and chloramines for fish and all other aquatic pond life and also protects and recovers the fishes natural mucus layer.

Always use ClearWaters Dechlorinator at the suggested dose levels when adding tap water to the pond. It is safe to use ClearWaters Dechlorinator at double strength when using after transporting fish, upon completion of parasite treatments, where fin damage is present and in situations where ammonia and nitrite are present within the water.

Treatment:

Mix evenly with the tap water for instant removal of the toxic substances.

For treating chlorinated tap water, add 50ml per 1000 litres of pond water.

To aid fishes recovery from damage and stress situations, add 50ml per 500 litres of pond water.

ClearWaters Dechlorinator is available from all participating Nishikoi stockists in the following pack sizes:

500ml Treats 12,500 litres

1000ml Treats 25,000 litres

2500ml Treats 50,000 litres
