

Nishikoi - Sinking

Nishikoi Sinking pellet provides the protein required if you want excellent growth in your bottom-feeding fish including Sturgeon species. The protein is highly digestible which allows your fish to utilise it more efficiently, helping to keep waste to a minimum and your pond water cleaner. The high-performance colour enhancing formula of Spirulina, Astaxanthin and Canthaxanthin ensures that any ornamental bottom-feeding fish will show off their true colours.

Sturgeon fish thrive in cold and highly oxygenated water and will remain active in the British winter. Don't forget to offer these fish some food throughout the year. 42% highly digestible protein with natural colour enhancers and stabilised vitamin C a Complete & Balanced Formulation.
